EXECUTIVE SUMMARY

Motivated Web Development Intern with a strong foundation in front-end web technologies and programming concepts. Skilled in building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, React, and Bootstrap. Familiar with version control using Git and basic web deployment practices using Vercel. Possess a good understanding of programming logic, data handling, and problem-solving through hands-on development experience. Seeking an internship opportunity to apply technical skills, learn industry practices, and contribute to real-world web applications.

PROJECTS

MovieFinder – Movie Search Web Application

- Built an interactive movie search web application using React with real-time movie data fetched from a public API
- Implemented dynamic search, movie listing, and detailed view features to enhance user experience
- Deployed the application using Vercel, demonstrating knowledge of frontend deployment and API integration [Live Demo](#)

Technologies: React, HTML, CSS, JavaScript, TMDB API, and Vercel

FindItNow – Lost and Found Web Application

- Developed a responsive web application that allows users to report lost items and submit found item details through user-friendly forms.
- Implemented structured data handling and clear UI design to improve usability and accessibility
- Designed the interface to support easy navigation, improving the efficiency of reconnecting users with their belongings [Live Demo](#)

Technologies: React, HTML, CSS, JavaScript, and Git
